

Finding HPS Electronic and Web Resources

A vast range of HPS-related e-journals, e-books and e-databases and other online information resources are available to you. Some of these are University subscriptions whilst others are freely available on the Internet. You can, however, only use them if you know they are there! The Whipple Library aims to help by documenting and providing access to HPS-relevant resources via our constantly updated webpages. All members of the Department, new and old, are encouraged to explore these from time to time to see what is available. You might find something you didn't previously know about! (See also the UL's resources@cambridge database). Here are just a few examples of some important, recent, freely available resources that have been added to the Whipple Library website.

From J. Maclise, *Surgical anatomy*, (London, 1856) [STORE 195:43-44](#)

Books from Darwin's Library

- [Darwin's Virtual Library](#) (digitised incl. full transcripts of his annotations)
- [Oral history of British science](#) (British Library Sound Archive: interviews with scientists at the centre of Britain's scientific endeavour in 20th century)
- [Royal Society 'Turning the Pages'](#): digital access to important manuscripts from their collections
- [Pyle Gateway](#) to digitized mediaeval and ancient manuscripts, many of them science/medicine related.
- [Hans Sloane's Correspondence Online](#) online summaries of letters of this famous 18th cent. scientist and collector
- [Social Science Research Network \(SSRN\)](#) Highly regarded free repository for social science research.
- [Wellcome Arabic Manuscripts Online](#) Early Journal Content on [JSTOR](#), now *freely* available.

Please let us know of important HPS web resources missing from our web pages.

More HPS undergraduate reading list e-books now available!

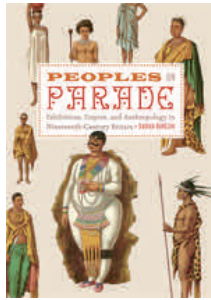

Find them via the University library's [ebook webpage](#), or [LibrarySearch](#). You can also find out about them and access them via our constantly updated '[E-books on HPS reading lists](#)' poster which can be found in the library, on HPS CamTools sites, and on the [Whipple ebooks webpage](#).

Important New Digital Rare Book Resource available @ Cambridge: [Early European Books Online](#)

This online resource complements [Early English Books Online](#), providing access to all works printed in Europe before 1701 and held in the participating libraries. It contains full-colour, high-resolution facsimile images scanned directly from the original printed sources, including binding, edges, endpapers, blank pages and any loose inserts. Available throughout the University and off campus using Raven password.

Keep up to date with important Whipple Library and HPS information matters by following us on Facebook and Twitter.

Sadiah Qureshi's [new book](#) is now in the [Whipple!](#)

HPS Research Skills Training Sessions 2011

1. How to access and use the *latest* HPS-relevant E-Resources:

Thurs 13 Oct, 4.00 pm in new museum gallery (for Part IIs)
Fri 21 Oct, 1.00 pm in Seminar Rm 1 (PGs & all else interested)

2. HPS-related rare book and manuscript collections in Cambridge and how to use them.

Fri 4 Nov, 1.00 pm, Seminar Rm 1 (For PGs & all else interested).

The Whipple Library's current Isaac Newton exhibition now available online

See the exhibition curated last Summer by HPS Part II students via our Rare Books web pages and the following address:

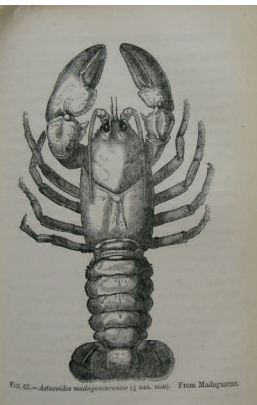

<http://www.hps.cam.ac.uk/library/newton/>.

See our newly updated [Rare Books pages](#) for further details of the Whipple Library's important rare book collections.

Ask Library Staff about possibilities for using Whipple rare books in your essays/dissertation/research projects.

A 'Planetarium', as illustrated by the Newton populariser Desaguliers in his *Course of Experimental Philosophy* (London, 1734) [STORE 82:6](#)

The Crayfish: an introduction to the study of zoology by T.H. Huxley ([STORE 150:13](#)). Find out more on Dawn's recent [Whipple Books Blog post](#)

Collection of important old History of Medicine Books comes to Whipple

Over the Summer the Whipple's important history of medicine collections were enhanced with the transferral of around 60 18th-20th century medical books from Cambridge University Medical Library. This most recent tranche includes books previously owned by Sir T. Clifford Allbutt (1839-1925), Regis Professor of Physic at Cambridge and inventor of the first short clinical thermometer; Alfredo Antunes Kanthack (1836-1898) who held the Chair of Pathology and whom the Pathology Library here in Cambridge is partly named after; and Sir George Murray Humphry (1820-1896) who held professorships in human anatomy and surgery and was the youngest hospital surgeon in England when he started working at Addenbrooke's in 1842. In addition to pathology and anatomy, subjects covered include early studies of medical institutions, such as St Bartholomew's in London, the Radcliffe Infirmary in Oxford. The collection has now been catalogued and can be found on Newton by searching for 'University of Cambridge. Medical Library.'

Cambridge University Library Research Skills Training Courses

These include sessions on e-resources, subject resource sessions, note taking, literature searching and IT training.
